

CENTER FOR COSMETIC DERMATOLOGY

1830 Town Center Drive
Suite 410
Reston, VA 20190
703-766-2220
www.dramiry.com

*Welcome to the Center for
Cosmetic Dermatology.
Here, you will receive a completely
personalized experience.*

*At our center you will be pampered with medical
treatments that use prescription-grade skincare
applications and products that create visible results
not attainable in traditional spas.*

*Let our Medical Aesthetician customize a treatment
for you and design a special at-home regimen that
will help your skin reach its optimum health.*

Appointments: *Please plan to arrive at least 15 minutes
prior to your appointment. We ask that you reserve all
appointments with a credit card. The reason for this
policy is to accommodate the many patients who are
waiting for an appointment. If you need to make a
change, simply give us 24 hour advance notice and we
will gladly reschedule you. Without notification of your
cancellation, your credit card may be charged for
services.*

Professional Products: *We offer an array of professional
skincare and makeup products, including Obagi, IS
Clinical. In order to enhance your overall beauty, ask
our Aesthetician to design a complete regimen for you*

Gift Certificates: *What gift could be more appreciated
than an invitation for total relaxation and wellness! Gift
certificates are available for treatments and products..*

PCA Exfoliating Treatment

This innovative and proven light-to-medium depth peel formula effectively exfoliates with a blend of lactic, citric and salicylic acids while bleaching and inhibiting pigment production with kojic acid and hydroquinone. PCA Exfoliating Treatment helps repair and reduce breakouts, control oil and soften lines.

Ultra Peel I Exfoliating Treatment

This hydrating and strengthening treatment contains a potent combination: 20% L-lactic acid, 10% trichloroacetic acid (TCA), lactic acid, ascorbic acid (vitamin C), plumping phytohormones and kojic and azelaic acids. Ultra Peel I will effectively treat pigment disorders, aging skin, menopausal skin and photodamaged skin.

Sensi Peel Exfoliating Treatment

This gentle solution is formulated primarily for ethnic skin as well as all other skin types and conditions. The Sensi Peel contains a blend of 12% L-lactic acid, 6% TCA, lactic acid, ascorbic acid, phytohormones and skin lighteners – kojic and azelaic acids. This peel is especially effective for dry, sensitive acne with excessive inflammation and rosacea; redness and inflammation subside substantially after treatment.

Smoothing Body Peel

This innovative body treatment is formulated to smooth, firm and hydrate while simultaneously evening skin discoloration. Pre-Peel Accelerator Mask first provides potent ingredients to soften and hydrate the epidermis, creating a more accepting environment for peel application to accelerate treatment results. Then the Smoothing Body Peel delivers TCA, salicylic acid and lactic acid with tyrosinase inhibitors to affect dramatic changes in the appearance and texture of the skin.

Clarifying Mask Treatment

The keratolytic action of this treatment helps to smooth surface texture, clear blocked follicles and reduce breakouts. Clarifying Mask has a blend of 20% salicylic acid and offers anti-inflammatory benefits along with strong keratolytic action to create even, healthy skin.

Pumpkin Peel Treatment

A powerful keratolytic and antioxidant therapy that brightens and rejuvenates the skin. Salicylic acid loosens and clears away dead surface cells while the treatment's rich nutrients infuse the skin with high levels of vitamins C and A, and antioxidants that protect the skin from environmental damage. This combination is essential to strengthen the collagen matrix that supports healthy, younger looking skin.

Oxygenating Trio

Enjoy a brighter and clearer complexion with this 3 step system. Step 1 and Step 2 condition the skin cells for higher tissue respiration while Step 3 stimulates the skin's metabolism to move toxins and destructive free radicals out of the tissues. This treatment will effectively reduce the appearance of the visible signs of aging, kill bacteria and leave the skin glowing, clear and healthy-looking. Asphyxiated, acne and sluggish skin benefit greatly from this treatment.

Detox Pore Treatment

This active blend of lactic, glycolic and salicylic acids effectively penetrates pores to dissolve impaction, kill bacteria, reduce inflammation and remove excess cell debris to leave the skin hydrated, purified and clear. An excellent choice for detoxifying all skin types.

Ultra Peel II & Esthetique Exfoliating Treatments

Retinol creams designed to enhance results and are used in combination with any other PCA Professional chemical peel to increase exfoliation and hydration, producing a tightening and brighten effect.

Microdermabrasion

Microdermabrasion is a noninvasive procedure that offers safe and controlled removal of the outer, dead layers of the skin. The remaining skin is smooth, fresh and rejuvenated. The massaging action of the treatment creates a mild flushing and cleansing effect below the surface of the skin, resulting in a vibrant, healthy appearance and complexion.

Microdermabrasion & Peel Combo
